## Alternative Management Strategies to address causal pressures (i.e. causes on land & in-stream)

**(Pro-forma for completion at and following the workshop. Include relevant management actions in existing plans/management strategies)**

**Note: Causal Pressures[1] - Based on comparing current WQ with draft WQOs**
**If current WQ is worse than draft WQOs, for each indicator, consider potential causes and management options**
**If current WQ is better than draft WQOs, consider the balance of "protection" actions to maintain WQ and "repair" actions to improve WQ**

| Causal Pressures[1] | Management Options | Comments |
|---|---|---|
| **Point Sources:** | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| **Rural (non-urban) Diffuse Sources (Changes in land use & management):** | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| **Urban Stormwater Runoff (Changes in urban land use & management):** | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| **Riparian Zone & In-stream disturbances:** | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| **Flow Alterations:** | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| **Other Causal Pressures:** | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
