Science & Estuaries Forum

Showcasing Estuarine Research and Management in Tasmania

Public Forum hosted by *NRM North*, and the Tasmanian Departments of *Environment, Parks, Heritage and the Arts*, and *Primary Industries and Water*

Thursday 15th May 2008

Tram Sheds Function Centre and Auditorium
Inveresk Rail Yards
4 Invermay Road
Launceston

9.00am – 4.00pm

Presentations will cover integrated studies and reporting, indicators and assessment tools, and partnerships. A detailed program of speakers and their presentation titles will be available soon.

To register your interest in attending and to receive the detailed program, please contact: Emma Murray, Geoscience Australia, emma.murray@ga.gov.au
Ph. (02) 6249 9019

Background

The National Estuaries Network (NEN) is a key mechanism for linking estuarine decision makers with scientists. The aim of the NEN is to improve the management and environmental conservation of Australia's estuaries. The network meets twice yearly and comprises estuary managers from each Australian state and territory as well as invited estuary researchers. Meetings are held over three days with the final day usually involving an open public forum, centring on a specific estuary-related theme. Specialists in that topic are invited to present.
